

## LED High-Bay Luminary for Showrooms - RU480-120

- extremely energy efficient due to high-performance-LEDs and **optimal thermal management** gives more light with less consumption, reduces the electricity bill
- durable and sustainable by the use of a very high metal portion > 95% (aluminum and stainless steel)
- time-less design
- low weight facilitates the assembly and with the very low wind resistance it relieves the static load
- the brightness of the luminary can be adjusted during operation from the power supply - optional central adjustable power supply
- simple light source change

Type	LED High-Bay Luminary for Showrooms - RU480-120
system output	approx. 128W (dimnable)
luminous flux / color temperature	approx. 14,500lm at 128W, approx. 4,000K (other color temperature on request)
dimmer function	100 – 10%
average expected LED lifetime	>50,000h
material, color	aluminum housing, plain anodized
dimensions	480mm diameter, 150mm high
weight	approx. 6kg
mounting	suspension on 3 stainless steel ring screws (see photo)
emergency power operation	optionally possible
production site	Made in Germany
certification	CE marked
application fields	Exhibition halls, museums, foyers, railway stations, storage halls, etc.
